REST FOR THE *ANIMALS*?
NON-HUMAN SABBATH REJUVENATION
IN PENTATEUCHAL LAW

INTRODUCTION

People use domesticated animals for a wide variety of purposes: food, wool and fur for clothing, work (draft animals, hunting dogs), entertainment, education, medical experimentation, and companionship. These functions may all be justified ethically and theologically, but unfortunately domestication of creatures has often resulted in their abuse.\(^1\) While abuse is probably as old as the domestication of animals itself, the burgeoning human population since the Industrial Revolution has caused great strain on the natural world. Humans have competed with wild animals for space, and the demand for food (especially meat) has put increasing pressure on farmers to produce food in large quantities and at low cost.

Only in recent years have scholars begun to consider the ethical implications of these developments, which often include inhumane treatment of domestic animals.\(^2\)

---

\(^1\) For a study of cruelty to animals, see Matthew Scully, *Dominion: The Power of Man, the Suffering of Animals, and the Call to Mercy* (New York: St. Martin’s, 2002).

\(^2\) Domestic animals in contemporary societies are often forgotten or cruelly treated and slaughtered, noticed only when a terrible disease infiltrates whole herds or governments recall meat and dairy. Some animal rights groups are now addressing this incongruity between the treatment of wild and domestic animals, but the discrepancy remains entrenched in society. Whether through ignorance or refusal to consider the evidence, most people think that pigs and cows and chickens are less important or unfeeling than penguins and capybaras and catamounts.

The view that animals are expendable in the face of human need or desire has dominated thoughts about animals for the last two or three centuries. For example, Descartes’ metaphysical dualism concluded that “animals, lacking any mind, reason, or true speech . . . are thus essentially bodies driven by strictly mechanical impulses” (William C. French, “Beast-Machines and the Technocratic Reduction of Life: A Creation-Centered Perspective,” in *Good News for Animals? Christian Approaches to Animal Well-Being* [ed. Charles Pinches and Jay B. McDaniel; Ecology and Justice Series; Maryknoll, N.Y.: Orbis, 1993], 26).
Religious communities also have been slow to recognize the accountability of humans towards nature, a fact reflected in the paucity of scholarly work concerning the biblical treatment of domestic animals.

Interest in the types of animals mentioned in the Bible, along with those animals present in surrounding regions, is expressed by zoological surveys and faunal analyses. Some scholars have examined the functions of animals in the ancient Near East, and the history of the domestication of animals. But very few biblical scholars have investigated in detail the ethical implications of the domestication of animals and their treatment, or

---

4 For example, Oded Borowski, Every Living Thing: Daily Use of Animals in Ancient Israel (Walnut Creek, Calif.: AltaMira, 1998).

whether the Bible expresses a moral ideal. For example, Christians are accustomed to interpreting the Bible’s command for humans to rule over and subdue the earth as permission to exploit animals without hesitation, even if only for amusement or comfort.

In recent years, some have claimed that ancient Israel did not even address the concerns of non-human creatures, and thus the Old Testament (OT) could actually be construed to support the modern mistreatment of animals. Cyril Rodd expresses this most clearly: the OT is “thoroughly anthropocentric, one of the worst vices in the eyes of those championing the rights of animals. . . . In the end, it is difficult not to say, ‘Why bother? We have the New Testament and modern moral sensitivities.’”

In contrast to this conclusion, some scholars have attempted to outline a theology of animal care from the OT as the foundation for New Testament (NT) statements.

---

7 Among many others, see Andrew Linzey, *Animal Theology* (Urbana, Ill.: University of Illinois Press, 1995); Scully, *Dominion*.

Though the Genesis creation account is usually the starting point, systematic and comprehensive examinations of the OT data regarding the treatment of animals are conspicuously lacking, and the treatment of texts dealing with the issue of creation care is often selective and even superficial. Furthermore, animals are usually considered to function for the benefit and enjoyment of humanity. A small minority of scholars supports the other extreme, reading the OT from the perspective of the earth and even giving preference to animals and plants (and rocks!) over human beings. This raises the question: With such divergent interpretations, is it possible to discern the true biblical attitude towards domestic animals?

11 For examples, see Norman C. Habel, ed., Readings from the Perspective of the Earth (Cleveland: Pilgrim, 2000).

12 Some may wonder why it is even necessary to understand the biblical view of animals if non-human creatures lack sentience and emotional lives. But many new studies suggest that humankind knows very little about the experiences, emotions, communication, and consciousness of other living things. Mark Bekoff argues for self-
This paper contends that care for non-human creatures is vitally important in the
Hebrew Bible, and that even the very law codes of Israel embody this concern (as well as
the myriads of other hints throughout the Pentateuch and the whole Old Testament).

As the Decalogue has often been considered foundational and universally relevant, many
scholars have studied it in detail. However, the great majority examine what these
commands meant to Israel, how they are to be applied for humanity today, or the
supposed historical development of the Decalogue. Even with the prevalence of these
cognizance, language, family structure, and even morality in some animals (“Animal
Passions and Beastly Virtues: Cognitive Ethology as the Unifying Science for
Understanding the Subjective, Emotional, Empathic, and Moral Lives of Animals,”
Zygon 41 [2006]: 71–104). See also L. Shannon Jung, “Animals in Christian Perspective:
Strangers, Friends, or Kin?” in Good News for Animals? Christian Approaches to Animal
Well-Being (ed. Charles Pinches and Jay B. McDaniel; Ecology and Justice Series;
(Walpole, N.H.: Stillpoint, 1999); Wennberg, God, Humans, and Animals.

13 For example, on the uniqueness and prominence of the Decalogue, see

14 For a survey of interpretation of the Decalogue, see Gerhard F. Hasel, “The
Sabbath in the Pentateuch,” in The Sabbath in Scripture and History (ed. Kenneth A.
Strand; Washington, D.C.: Review and Herald, 1982), 21–43. Although supporting
diachronic analysis, Bernard M. Levinson (Introduction to Theory and Method in Biblical
JSOTSup 181; Sheffield: Sheffield Academic, 1994], 9) states that “increasing numbers
of scholars, eschewing conventional diachronic analysis as atomistic and sterile, embrace
the ‘literary approach’ that views the text as synchronically coherent, even the product of
a single author . . . to demonstrate the meaningfulness of its composition.” See also
and Cuneiform Law: Revision, Interpolation and Development (ed. Bernard M. Levinson;
JSOTSup 181; Sheffield: Sheffield Academic, 1994), 15–36; Walter C. Kaiser, Jr.,
Toward Old Testament Ethics (Grand Rapids: Zondervan, 1983). I tend to agree with
Hasel (“The Sabbath,” 28) that with “such insurmountable methodological problems and
subjective judgments, it is safe to proceed on the basis of the context of the Decalogue
(and the Sabbath commandment) in the book of Exodus itself.” See further Joe M.
Sprinkle, ’The Book of the Covenant’: A Literary Approach (JSOTSup 174; Sheffield:
JSOT Press, 1994).
anthropocentric studies (from early interpreters up to the present day), only a few have traced how concepts in the Decalogue relate to similar themes in the Book of the Covenant, the Holiness Code, and Deuteronomy.\(^{15}\)

Thus, in this synchronically focused paper, I have chosen to concentrate on the motif of Sabbath rest as it relates to non-human creatures in Israel’s legal material. In comparison to the Decalogue, this concept seems to be broadened in definition and scope in each of the other sections of law. Each pertinent passage referring both to חיות and בדם (or a specific animal) within the Decalogue, the Book of the Covenant, the Holiness Code, and Deuteronomy is examined in detail, considering the larger contexts, structures, and word usages.\(^{16}\) Significant connections to the rest of the Bible are also noted and some contemporary implications of the conclusions are suggested.

THE LAW CODES

The Decalogue (Exod 20:8–11)

According to J. Durham, even the extreme brevity of this “foundational layer of Yahweh’s expectations” does not warrant the removal of animal care from these ten

---

\(^{15}\) Weinfeld (Deuteronomy 1–11, 257) mentions that “the religious and moral principles of the Decalogue take form in various laws of the Pentateuch,” but does not flesh out this statement. Anthony Philips makes a case for the Decalogue as the criminal law for Israel before the exile, rather than a later construction (“The Decalogue: Ancient Israel’s Criminal Law,” in A Song of Power and the Power of Song: Essays on the Book of Deuteronomy [ed. D. L. Christensen; Winona Lake, Ind.: Eisenbrauns, 1993], 225–46). Hasel (“The Sabbath,” 31) notes that also “in the Hittite legal tradition . . . short later versions of the same laws may be expanded or contracted.”

\(^{16}\) A few other passages include both חיות and בדם (or a particular animal name). However, these are all in relation to instructions on specific sacrifices and are thus not addressed in this paper (e.g., Num 28:9).
commands. Thus, the disposition towards creaturely Sabbath rest in the law codes of the Pentateuch seems to arise from one word in the Decalogue. Within the list of those who are to do no work on the Sabbath, דומם are mentioned. Thus, in contrast to the modern values placed on animals, non-human creatures in the OT are not just to be eaten, sacrificed, and used for work. Rather, coherent with the sanctity of life expressed through other laws, they are also deserving of rest on the Sabbath.

Indeed, the very structure of the fourth commandment highlights not just the motivation, or cause, or even the injunction itself, but those who are to rest and do no work (by placing the beneficiaries of the Sabbath in the apex of the chiasm).

\[\text{John I. Durham, } \textit{Exodus} \text{ (WBC} \text{ 3; Waco, Tex.: Word Books, 1987), 300.}\]

\[\text{Despite a wide range of hypotheses concerning the temporal relationships between the various law codes, many scholars see the Decalogue as existing prior to the more expanded legal sections of the Pentateuch. For some examples, see Rao, } \textit{Ecological and Theological Aspects}, 5–54.\]

\[\text{Several other scholars have also noticed this chiastic structure. See Mathilde Frey, } \text{“The Sabbath in the Pentateuch: An Exegetical and Theological Study” } \text{(PhD diss., Andrews University, forthcoming). Hasel (“The Sabbath,” 29) sees this basic structure but with two commands (vv. 9–10b) and two motivational clauses (vv. 10a, 11a). Carol Meyers } \textit{(Exodus} [\text{New Cambridge Bible Commentary; Cambridge: Cambridge University Press, 2005}], 132) \text{ points out that seven categories of living creatures are mentioned as beneficiaries of the Sabbath rest (in C of the structure), highlighting the “totality of household members required to observe the Sabbath.” See also U. Cassuto, } \textit{A Commentary on the Book of Exodus} \text{ (trans. Israel Abrahams; Jerusalem: The Magnes Press, 1997); William H. C. Propp, } \textit{Exodus 19–40: A New Translation with Introduction and Commentary} \text{ (AB} \text{ 2A; New York: Doubleday, 2006), 177.}\]
A—Remember the Sabbath day (שָבָת), to keep it holy (כָּרְךָ) (v. 8)

B—six days (שָׁנָה) you shall labor and do (עָמַד) all your work, but the seventh day (יּוֹבֵעַ וְשָׁבָתִי) is the Sabbath of YHWH your God; (vv. 9–10a)

C—in it you shall do no work: you, nor your son, nor your daughter, nor your male servant, nor your female servant, nor your animals (בָּהֲמוֹת), nor your stranger that is within your gates (v. 10b)

B’—for in six days (שָׁנָה יָרְאֵם), YHWH made (עָמַד) the heavens and the earth, the sea, and all that is in them, and rested on the seventh day (יָיִן וְשָׁבָתִי) (v. 11a)

A’—Therefore YHWH blessed the Sabbath day (שָבָת) and made it holy (כָּרְךָ) (v. 11b)²⁰

The word בָּהֲמוֹת usually refers to the high carriage domestic animals.²¹ In other words, the focus of the Sabbath included animals along with the human residents of the household. Animals are also to participate in the celebration of God’s creative activity. The other six days, they are to labor along with the rest of the household, but the work (מַלאֹכָה) is not to be done (עָמַד) on the Sabbath. These last two words are also used in Genesis 2, where God rests from the work (מַלאֹכָה) that he had done (עָמַד).²² The Hebrew word מַלאֹכָה is usually translated as occupation or business, and often refers to

---
²⁰ Unless otherwise noted, all biblical quotations are the author’s.

²¹ Some passages hint that perhaps a more comprehensive definition is possible, such as “all animals, both large and small” (Gen 8:1; Lev 11:2–6; Deut 14:4–7). If this is the case, the fourth commandment calls all creatures to join in the Sabbath blessing. Weinfeld (Deuteronomy 1–11, 308) seems to hint at this possibility.

²² Other connections with Genesis 2 are also terminological (כָּרְךָ, מַלאֹכָה and possibly שָבָת). H. Ross Cole (“The Sabbath and Genesis 2:1–3,” AUS 41 [2003]: 5–12) discusses evidence for and against the Sabbath as a creation ordinance. He finds that the divine sanctification of the day (by ceasing work not by stopping all activity, literary structures, and the correlation with new human history) shows the human focus, universality, and continuity of the Sabbath. See also Hasel, “The Sabbath,” 21–43.
skilled labor. Scholars have almost exclusively focused on the human aspect of this work, but perhaps the picture is not complete without animals.23

Even though the Decalogue seems to be referring only to the domestic animals used for service in Israel (ox, donkey, etc.), it is important to consider the contextual significance of the Decalogue. Some scholars have suggested that the Decalogue is written primarily in the interests of wealthy male householders who were abusing their power over the rest of the community and did not want their position to be threatened.24 However, the Ten Words from God could also reflect the covenantal leadership ideal of service to others rather than selfish lordship.25 If this is the case, a provision for non-human Sabbath rest would likely ensure humane treatment on other days as well.26 In fact, although beyond the scope of this paper, the subsequent law codes do prescribe

23 J. Milgrom and D. P. Wright, “Halakhah,” TDOT 8:325–31. It is very interesting that animals are included in this work that involves more than simply physical labor. Raoul Dederen (“Reflections on a Theology of the Sabbath,” in The Sabbath in Scripture and History [ed. Kenneth A. Strand; Washington, D.C.: Review and Herald, 1982], 296–7) states that “by resting on the Sabbath day God is making plain His desire to enter into a personal relationship with His creation.” If not carrying on business as usual on the Sabbath, creatures are freed to participate in this relationship as much as is possible.

26 Some scholars have argued that the Decalogue is essentially forgotten in the rest of the Old Testament, but Carol Meyers (Exodus, 163–6) finds it prominent and assumed, as God speaks directly to the people, all of the stipulations are found or implicit elsewhere in the Pentateuch (even in Genesis), the commands are apodictic, and each is addressed in second masculine singular (showing the importance of individuals).
kindness and care for animals, even while they are working (e.g., do not muzzle an ox
while treading [Deut 25:4], help lost or heavily laden animals [Exod 23:4–5; Deut
22:4]).

The meaning and origins of.tbv have been debated by scholars. After
considering the other uses of the verb.tbv, some contend that the Sabbath does not at all
entail cessation of labor or rest. However, this interpretation does not seem to consider
the immediate context of the word in the creation passages and Sabbath commandments,
in which at least 11 times in the Pentateuch, the Sabbath is associated with the phrases
“do not work” or “do not do customary business” on the Sabbath. The motivation given
in Exodus 20 for this ceasing of work is that God rested on the seventh day from his work

27 In addition, there are hints that the Israelite household should portray (as a
microcosm) the proper relationship between Israel’s leaders, people, animals, slaves,
foreigners, etc. The leader should care for all domestic animals in the household and
provide an opportunity for Sabbath rest, and correspondingly Israel should care for rather
than abuse all of the living creatures of the earth. Charles H. H. Scobie (The Ways of Our
the individual Israelite as a corporate member of four other groups, as “concentric
circles” of representation. See also Christopher J. H. Wright, The Mission of God:
Unlocking the Bible’s Grand Narrative (Downer’s Grove, Ill.: IVP Academic, 2006),
291–3.

28 Carol Meyers (Exodus, 173) finds the connection with the Akkadian
unsubstantiated, and that Sabbath involves cessation of labor with “no religious or cultic
context.” For further discussion of possible Sabbath origins, see Hasel, “The Sabbath,”
21–43.

29 See G. Robinson, “The Idea of Rest in the Old Testament and the Search for the
Basic Character of the Sabbath” ZAW 92 (1980): 32–42. In contrast, Durham (Exodus
19–40, 332) sees strong connections between the noun.tbv and rest, with the noun.tbv
coming from the verbal root.tbv. Duane L. Christenson (Deuteronomy 1–11 [WBC 6A;
Dallas: Word Books, 1991], 118) argues that the verbal root arose from the noun, but
maintains the close connections.

30 See Gen 2:3; Exod 16:23, 29; 20:10; 23:12; 31:15; 34:21; 35:2; Lev 23:3; 25:4;
Deut 5:14.
of creation.\textsuperscript{31} The verb used for God’s rest in v. 11 is רֵאָב, which has connotations of repose and tranquility.\textsuperscript{32} As will be explored further for other passages, this may imply that animals were to participate in the Sabbath rejuvenation as well as ceasing from work.\textsuperscript{33}

**The Book of the Covenant (Exod 23:10–12)**

Although often thought to be a random collection of laws,\textsuperscript{34} recent work has shown an overarching structure in the Book of the Covenant.\textsuperscript{35} A recurring theme for many of the

\textsuperscript{31} As Darby Kathleen Ray (“It’s About Time: Reflections on a Theology of Rest,” in *Theology That Matters: Ecology, Economy, and God* [ed. Darby Kathleen Ray; Minneapolis: Fortress, 2006], 170) states, “God is not a workaholic. In fact, God pauses periodically, predictably, habitually to survey and enjoy God’s work.”

\textsuperscript{33} In spite of the fact that animals were crucial for the day-to-day survival activities of harvesting crops, threshing grain for bread, etc., the Decalogue seeks to ensure that animals are not abused or overworked. See Borowski, *Every Living Thing.*

\textsuperscript{35} Westbrook (“What is the Covenant Code?” 36) convincingly proposes that “[a]pparent inconsistencies should be ascribed to the state of our ignorance concerning the social and cultural background to the laws, not necessarily to historical development and certainly not to an excess of either subtlety or incompetence on the part of their compiler.” Calum M. Carmichael (“A Singular Method of Codification of Law in the
commands is that of concern for the oppressed. Somewhat surprisingly then, at least based on the multiple examinations of the Covenant Code focused solely on humanity, most of Exod 21:28–22:13 involves laws dealing with animals.\textsuperscript{36}

In Exod 23:10–12, it seems that the single word of the Decalogue that refers to non-human Sabbath rest is expanded (picking up on the motivation for rest on the Sabbath) to portray further what Sabbath means for animals beyond simply ceasing from work. The extensive parallels between vv. 10–12 and the fourth commandment in Exodus 20 show the connections of this passage to the Decalogue.

\textsuperscript{36} In addition to the Sabbath and sabbatical year commands, restitution is extra if animals are stolen (Exod 21:33; see also Lev 24:18); animals are responsible for actions—killing, bestiality, etc (Exod 21:28; 22:18; see also Lev 18:23; 20:15); baby animals are to remain with their mother for a time (Exod 22:30); kindness to neighbors involves kindness to their animals (Exod 23:4); burdens of animals should be reasonable (Exod 23:5), etc.

</tbody>
</table>

Interestingly, שב is used for humanity’s Sabbath rest in Exod 23:12, while the animals are to be rejuvenated on the Sabbath in the same way that God rests in Exodus 20 (שבת). This special connection between God and animals seems to imply that God places a high value on all his creatures, not just humanity.\(^{37}\) Although in other places the Bible is clear that human life is more sacred than animal life (e.g., Gen 9:5–6), this does not mean animals are expendable or to be used and abused. Instead, they are to rest (שב) on the Sabbath. Perhaps because this connection between animal rest and God’s rest is so clear in the text, and yet so unexpected in comparison to current modern conceptions of animals, many scholars seem to be surprised that “even animals” are involved in the Sabbath rest.\(^{38}\)

---

\(^{37}\) Weinfeld (*Deuteronomy 1–11*, 308) notes that Exodus places humans and animals on the same level.

Not just a cessation of work, כורז has connotations of repose, tranquility, and even psychological security. Many new studies are revealing that humankind knows very little about the so-called “anthropomorphic” experiences, emotions, communication, and consciousness of other living things. In addition, many connections and similarities can be drawn between humanity and animals, perhaps more similarities than differences. Although the thoughts and feelings of animals cannot be known with certainty until

III.: InterVarsity Press, 2004], 296) notes that they surprisingly include slaves, but does not mention the inclusion of animals at all. Calum M. Carmichael states that “a puzzle is why the ox and the ass are given consideration first, or even at all” (The Origins of Biblical Law: The Decalogues and the Book of the Covenant [Ithaca: Cornell University Press, 1992], 210).  

[39] Coppes, TWOT 2:562. Oswalt (NIDOTTE 3:58) argues that כורז involves safety and “relief from threat or attack.” Others have argued that כורז never means rest from work, only rest from trouble. George Berry compares this word to the Babylonian root referring to the pacification of the anger of the gods (“The Hebrew Word כורז,” JBL 50 [1931]: 207–10). Walter Kaiser, Jr. (“The Promise Theme and the Theology of Rest,” BSac 130 [1973]: 138) sees other connotations of rest involving “historical (Canaan), soteriological (salvation), and eschatological (the kingdom and our reign with Christ),” where God’s rest is the gift of land and his presence, not so much the Sabbath. However, the context of the word in the Sabbath and creation passages seems to clearly indicate cessation from work, as well as any other meanings of rest from weariness, refreshment, etc. Interestingly, כורז does not seem to mean “rest” in any passage where imperatival forms are used; thus, perhaps כורז requires הבש in order to mean rest.

[40] Much research has been done recently involving the sentience and emotional lives of animals. For summaries, see Kowalski, The Souls of Animals; Bekoff, “Animal Passions and Beastly Virtues,” 71–104; Jung, “Animals in Christian Perspective,” 47–61; Wennberg, God, Humans, and Animals. 

[41] For instance, animals receive many of the same commands and blessings as do humans (e.g., “be fruitful and multiply” [Gen 1:22]; eat plants [Gen 1:30]; the death penalty for killing a human [Gen 9:5–6]; covenant with God [Gen 9:9–17]). William French argues logically that if animals do not suffer pain, then experiments designed to find out about the pain-causing properties of various chemicals or procedures make no sense; science depends on the similarities between human and animal sensations and reactions (“Beast-Machines,” 32). See also Tom Regan, Animal Sacrifices: Religious Perspectives on the Use of Animals in Science (Philadelphia: Temple University Press, 1985).
humans learn the “language” that each animal speaks,\(^{42}\) the Bible seems to hold the Israelites accountable for the suffering and neglect of animals.\(^{43}\)

In addition to the corresponding structures mentioned above, Exod 23:10–12 specifically connects the sabbatical year with the Sabbath.\(^{44}\) In fact, the reason for this time of rest for the land is that the poor and the wild animals may eat. So, not only is the Sabbath rest to pertain to domestic animals, but on some level all creatures are to participate in the results of the Sabbath or connections to it.\(^{45}\)

In the purpose clause used here to describe the reason for the Sabbath (“in order that [לָמוֹן] your ox and your donkey may rest”), the focus is shifted from the head of the household to those who would likely be oppressed, the animals (and the servants and foreigners). In addition, the ox and the donkey are specified here, so that these two

\(^{42}\) Even ants have been shown to possess incredibly complex “language” abilities, expelling minute amounts of dozens of chemical compounds at differing times and in various amounts to speak to each other in “phrases” and even “sentences.” See Bert Hölldobler and Edward O. Wilson, *The Ants* (Cambridge, Mass.: Belknap Press, 1990).

\(^{43}\) An interesting further study could compare Prov 12:10, where the righteous know (דָּבְכִים) the יִתְנָה of their animals, to Exod 23:9, where Israel knows (נָתַן) the יִתְנָה of the stranger. The use of יִתְנָה also links both passages to the concerns of the Covenant Code for the oppressed and to God’s rest in Exod 31:17.

Indeed, since Israel had been delivered and were to imitate God, all the surrounding laws in the Covenant Code were to protect those most likely to be victims in society. Bruce Rosenstock (“Inner-Biblical Exegesis in the Book of the Covenant: The Case of the Sabbath Commandment,” *Conservative Judaism* 44 [1992]: 37–49) notices the connection between Exod 23:9 and Exod 23:12, both having יִתְנָה as the root for the alien. However, he regretfully does not touch on the connections between the rest for animals and God’s rest. See also U. Cassuto, *A Commentary on Exodus*.

\(^{44}\) Carol Meyers (*Exodus*, 202) states that Exodus 23 “[synchronizes] the concept of rest for the land with Sabbath rest for humans and animals on the *seventh* day.”

\(^{45}\) U. Cassuto (*A Commentary on Exodus*, 301) considers these verses to be Hebrew poetry with rhythmic parallelism.
animals who likely worked the hardest of all during the week would be certain to receive proper Sabbath treatment. One could not say that the ox and the donkey did not count as בִּימֵי בָּהֲמִים in order to keep working them seven days a week.

In fact, in contrast to the Decalogue in Exodus 20 and Deuteronomy 5, where servants are mentioned before animals (and Leviticus 25 where servants and strangers are mentioned before animals), here animals are the first category of recipients of Sabbath blessings. These three groups seem to be interchangeable as far as priority in the Sabbath passages, and the different orderings may be related to the focus and emphasis of each passage. As Exodus 23 and the Book of the Covenant specifically emphasize care for the downtrodden, the apparent prioritization of animals reflects this focus. Perhaps animals would be the ones most likely to suffer abuse or neglect, even more than servants or strangers, since they cannot speak humanity’s language. Thus, the Bible shows concern for the very lowest-of-the-low (in humanity’s conception, at least).

---

46 The Decalogue order is servants, animals, strangers; the Covenant Code order is animals, servants, strangers; the order in Leviticus 25 is servants, strangers, animals; Deuteronomy 5 returns to the order of servants, animals, strangers. This could be another interesting study, considering the overall themes of each legal section in comparison to the order of Sabbath beneficiaries.

47 Martin Noth (Exodus: A Commentary [Philadelphia: The Westminster Press, 1962], 190) states that animals are not really in view here, but only “the sense of a return to something original. Hence we could also understand that express concern is taken for animals... not because they were the object of a love which we can hardly presuppose in the ancient world, but because they are an integral part of the creation which from time to time is to return to its ‘rest.’” However, it seems that the mention of specific vulnerable classes emphasizes the universality of the Sabbath in this passage. See also H.R. Cole, “The Sabbath and the Alien,” AUSS 38 (2000): 223–9; Nelson, “Deuteronomy 5:1–15,” 282–7.
The Holiness Code (Lev 25:2–7)

Although the Sabbath commandment is not reiterated in Leviticus in the same manner as it was in the Book of the Covenant, observance of the Sabbath is assumed in several instances, and is mentioned more specifically in regards to the festivals and the Day of Atonement (Lev 16:31; 19:3, 30; 23:3, 8, 11, 15–16, 32, 38; 24:8; 26:2). However, in comparison to Exodus, the concept of the sabbatical year seems to take on a greater significance in the Holiness Code (Leviticus 19–26).48

Phrases and wording again correspond to the fourth commandment of the Decalogue as well as Exod 23:10–12, as parallels are drawn between the resting of the land itself on the seventh year and the command to rest on the seventh day.49

---

48 Jacob Milgrom (Leviticus 23–27: A New Translation with Introduction and Commentary [AB 3B; New York: Doubleday, 2001], 2157) also notes parallels between this passage and Lev 23:3a. Interestingly, Calum Carmichael (“The Sabbatical/Jubilee Cycle and the Seven-Year Famine in Egypt,” Bib 80 [1999]: 224–39) believes that the Sabbatical year cycle commemorates the famine-like conditions for Joseph in Egypt. F. Ross Kinsler (“Leviticus 25,” Int 53 [1999]: 395–9) connects the Exodus to the Jubilee and the care of creation. Lee Casperson (“Sabbatical, Jubilee, and the Temple of Solomon,” VT 53 [2003]: 283–96) finds this suspension of agriculture on the sabbatical and jubilee years to be the most important function, but also recognizes several others. Sidney Hoenig concludes that the jubilee is only 49 days, as 2 years off for crops would be extreme hardship (“Sabbatical Years and the Year of Jubilee,” JQR 59 [1969]: 222–36). However, newer research on the ecology of Israel states that without this rest for the land every seven years, all the topsoil would be depleted quickly and the arability of the land would be lost (Aloys Hüttermann, The Ecological Message of the Torah: Knowledge, Concepts, and Laws Which Made Survival in a Land of “Milk and Honey” Possible. Atlanta: Scholars Press, 1999).

Although this passage does not refer directly to the weekly Sabbath, the parallels with Exod 20:8–11 and Exod 23:10–12 correlate strongly with the concepts, vocabulary, and even specific phrases that are used in relation to the weekly Sabbath. What is striking about this passage along with Exod 23:10–12 is the inclusion of the wild animals, so that “no one living in Israel is excluded.” The notion of care even for the animals

---

50 E. Haag (“שבת” *TDOT* 14:383) notes that Exodus 23 refers not only to rest for the land, “but to a process in which every seven years the cultivation of the land comes to a conclusion comparable to the cessation of work on the seventh day.” Milgrom (*Leviticus 23–27, 2154–7*) also compares these two passages in chart form.

further removed from contact with humans (and that might even hurt and kill humans) makes it clear how much God cares for all of his creatures.

The following structure emerged after further examination of this passage:

A—land will keep a שבט for YHWH (v. 2)

B—six years (זמנה) sow (זרה) field, prune (רמות) vineyard, gather fruit (v. 3)

C—seventh year is a שבט for the land, a שבט to YHWH (v. 4a)

B’—seventh year—do not sow (זרה) or prune (רמות) or reap or gather (vv. 4b–5a)

A’—year of שבט for the land—yield (שбл) of this is for humans, והמה and חיות which are in your land (vv. 5b–7)  

Interestingly, the focus of this passage seems to be the שבט שבט for the land, although it is to YHWH. This intensifying sabbath terminology (שבט שבט) is rare in the

---

52 Although A and A’ are closely linked with C, the unique phrase שבט שבט seems to set C apart. Another possible structure for this passage is a block parallelism:

A—land will keep a שבט to YHWH

B—six years sow field (זרה), prune vineyard (רמות)

C—gather fruit

A’— שבט שבט for the land, שבט to YHWH

B’—seventh year—do not sow field (זרה) or prune vineyard (רמות)

C’—do not reap what grows of its own, do not gather; food is for humans and animals

Although this takes into consideration the threefold mention of both grapes and harvest, it does not seem to deal adequately with the prominent term שבט in v. 4, or show any connections other than conceptual between C and C’. Milgrom (Leviticus 23–27, 2158) sees a chiasm within v. 6, as well as between v. 2 and v. 4.

53 The land has a special focus here, implying that the Sabbath (and sabbatical year) rest and care for creation goes beyond domestic and wild animals to all that God has made. Indeed in 2 Chron 36:21, the land was finally able to enjoy the Sabbaths that had been denied it by disobedient Israel. Aloys Hüttermann (The Ecological Message of the Torah, 149) connects the sabbatical year with the protection of soil fertility and water availability, stating that the Israelites lived in a land that was not well-suited to agriculture but needed special care, as the milk and honey “translated into modern plant sociology and knowledge of succession” refer to “a macchia, a region of Mediterranean hard scrub.” He considers the Torah to contain the keys to biological as well as spiritual
Pentateuch and occurs only five other times (Exod 31:15; 35:2; Lev 16:31; 23:3, 32), two in relation to the weekly sabbath and two regarding the Day of Atonement.¹⁴

Thus, the Holiness Code expands the Sabbath commandment in the Decalogue in similar ways as Exodus 23 (e.g., application to both domestic and wild animals), but extends the benefits to the land as well.⁵⁵ Clearly the land is not alive in the same way as oxen or donkeys, but it is also deserving of a sabbath rest.⁵⁶

**The Decalogue Recapitulated (Deut 5:12–15)**

In Deuteronomy 5, the Decalogue is presented in speech or sermon form, and non-human rest on the Sabbath is treated slightly differently than in Exodus 20.⁵⁷ A chiastic structure similar to Exod 20:8–11 can be noted in the Deuteronomic version of the Sabbath life. In a surprising twist of focus, Northcott (The Environment and Christian Ethics, 187) discusses the sabbath for the land as vital to the survival of the covenant community, but does not mention animals!

¹⁴ E. Haag (“תבש,” TDOT 14:389) refers to this phrase that is “in superlative construction. . . as an intensification” of Sabbath.

⁵⁵ Gordon J. Wenham (The Book of Leviticus [Grand Rapids: Eerdmans, 1979]) notes that the sabbath for the land constitutes the first of three main sections in Leviticus 25. He considers the possibility that the Israelites became nomads during the sabbatical years, picking and gathering whatever was available.

⁵⁶ Leviticus 26:31–44 also includes the concept of sabbath rest for the land, but animals are not specifically mentioned in relation to sabbath in that passage.

⁵⁷ Peter C. Craigie (The Book of Deuteronomy [Grand Rapids: Eerdmans, 1976]) finds the Decalogue to be the heart of the message of Deuteronomy, but as the legal aspect of the covenant, it is law for those already redeemed. U. Cassuto (A Commentary on Exodus, 250) comments that the addition of ox and donkey in Deuteronomy 5 is “extension for the sake of particularization.” Weinfeld (Deuteronomy I–II, 308) notes the influence of Exodus 23 here.
commandment, again with the beneficiaries of the Sabbath at the center.\(^{58}\) The parallels between these passages continue to build as follows.

</tbody>
</table>

The main difference in this passage in comparison to Exodus 20 is the motivation for the Sabbath. The Israelites are reminded that they were once slaves as well, but YHWH delivered them. Thus, in remembrance of their deliverance, they are to keep the Sabbath. In addition, they are to have special concern for their own servants. In order to

---

continue to remind Israel from whence they have come, the servants are mentioned twice in v. 14 as deserving rest on the Sabbath just as much as others.

In addition, this focus on the downtrodden and potentially oppressed members of society also explains this most comprehensive list of animals in the passages concerning non-human Sabbath rest. As noted above, the ox and donkey were more likely to be abused, exploited, or oppressed.\(^{59}\) By mentioning them particularly in addition to all the \(\textit{הנהננים}\), the focus on deliverance is heightened and the resulting duty of sensitivity to the downtrodden is highlighted. Deuteronomy contextualizes the liberation to animals. Thus, although animals within the household are focused upon in conjunction with the Sabbath, and the neighbors’ animals are not mentioned specifically (unlike other passages concerning animal care, such as Exod 21:33; 23:4, 5; Deut 22:1, 4), this passage seems to suggest more than just an anthropocentric self-preserving care for the work animals.

Therefore, both statements of the Decalogue emphasize important aspects of the reasons behind God’s covenant ideals for his people. The witnesses of original creation and God’s deliverance from Egypt provide motivations par excellence for Sabbath keeping.

**OTHER BIBLICAL CONNECTIONS**

The care for animals that is portrayed in the legal passages of the Pentateuch\(^{60}\) in regard to rest on the Sabbath is a theme that can be traced through the rest of the Old Testament

\[^{59}\text{Borowski, } \textit{Every Living Thing}, 232–3.}\]

\[^{60}\text{Although not examined in this paper because they do not involve the Sabbath, the dietary laws in Leviticus 11 and Deuteronomy 14 also seem to reflect great care for}\]
and into the New Testament with continuity. Although many texts imply or allude to this care without explicit mention, others jump out as picturing God’s love and concern for his creatures and humanity’s responsibilities to care for and provide rest for animals.\(^{61}\)

Although linkages between Sabbath rest and animals in the rest of the Old Testament are not directly stated, in the New Testament Jesus refers to the laws concerning animal care on the Sabbath. In response to the accusation that his healing on the Sabbath broke the fourth commandment, Jesus replied in Matt 12:11 that sheep (or animals and knowledge of the fragile ecosystems in which Israel dwelt. In a provocative and convincing fashion, Hüttermann (The Ecological Message of the Torah, 77) argues that many animals were prohibited as unclean meat in order to protect them, and the Israelites were to harvest “those resources which do not cause any ecological harm but otherwise leave nature intact and alone as much as possible.”

\(^{61}\) The creation narratives (Genesis 1–3) set the foundational mandate for creation care. Additionally, in passages like Jonah 4:11 and the flood story (Genesis 6–9), it is obvious that humans are not the only creatures for whom God shows compassion. According to Hüttermann (The Ecological Message of the Torah, 12–58), no other flood stories in the ANE depict humans or gods caring about and saving the animal world.

Interestingly, God seems to equate animals to humans in many ways. In Exod 19:3 (and Exod 34:3), the animals were also not to touch Mt. Sinai or they would be killed. In Num 8:17, God seems to consider animals as part of the children of Israel. Psalm 36:7 states that God saves both man and בְּנֵי הָאָדָם. In Jonah 3:7–8, animals are to fast along with humans and cry out to God for salvation from the destruction of Nineveh. Job 12:7–10 implies that animals know that God is in charge and directing events of the world, even the lives of every living thing.

As illustrated in the Sabbath commandments, humans are to imitate God in his care for animals. In Prov 12:10, the one who is righteous is the one who cares for the מֵתוֹנָה of domestic animals. The noun מֵתוֹנָה is used broadly to describe everything from personhood to specific individual desires. Ellis Brotzman (“Man and the Meaning of מֵתוֹנָה,” BSac 145 [1988]: 400–409) notes ten semantic range categories for מֵתוֹנָה, with the major ones being appetites, persons, living being, pronouns, and emotions. Although the usage for animals is considered a minor meaning, “man’s distinctiveness [is] not derived from mere use of the word” (Brotzman, “Man,” 407). Although it is not clear which meaning is referred to here, it is surely more than the basic needs of food and water that many would automatically assume by the usual English translation of “life.” More than just making sure the animals live (or are humanely slaughtered), a righteous man knows the “soul” (as it were) of his animal: the desires, appetites, inner living being, even emotions, passions and personality.
oxen and donkeys in Luke 14:5) could be lifted out of a pit on the Sabbath. This implies that if animals should be cared for on the Sabbath, how much more should humanity! 62 Although this is not an exact citation of the law in Deut 22:4, Jesus’ *qal wahomer* argument depends upon the spirit of animal rest and care that is portrayed in the Sabbath commandments of the Pentateuch.

In Luke 13:15, Jesus also mentions the well-being of oxen on the Sabbath who need water to drink, and therefore promotes the healing of humans on the Sabbath as well. By mentioning the loosing of oxen from their stalls in order to give them a drink, this passage seems to assume that the oxen were not working on the Sabbath (as commanded in Exod 20:8–11; Exod 23:10–12; Deut 5:12–15), but remained in their stalls resting from their labors. So, even in Jesus’ day, the importance of rest and repose for animals on the Sabbath was maintained. Again, though Jesus is not directly quoting the

62 “If what is involved in the sabbath rescue of the animal is only prudent husbandry, then the extension to the afflicted human, who of course can wait, does not follow” (George L. Frear, Jr., “Caring for Animals: Biblical Stimulus for Ethical Reflection” in *Good News for Animals? Christian Approaches to Animal Well-Being* [ed. Charles Pinches and Jay B. McDaniel; Ecology and Justice Series; Maryknoll, N.Y.: Orbis, 1993], 7). See also Donald A. Hagner, *Matthew 1–13* (WBC 33A; Dallas: Word Books, 1993), 333–4. Apparently, some rabbis did not condone the rescue of an animal that fell in a pit on the Sabbath, but “they at least allowed it to be made comfortable in the pit,” and thus Jesus “was on common ground with His theological opponents in approving humane action to animals in need” (Walter F. Specht, “The Sabbath in the New Testament,” in *The Sabbath in Scripture and History* [ed. Kenneth A. Strand; Washington, D.C.: Review and Herald, 1982], 98–99). Jesus’ reasoning is actually dependent on the similarities between humans and animals, rather than highlighting the differences (Richard Bauckham, “Jesus and Animals I: What did he Teach?” in *Animals on the Agenda: Questions About Animals for Theology and Ethics* [ed. Andrew Linzey and Dorothy Yamamoto; Urbana, Ill.: University of Illinois Press, 1998], 47).

**CONTEMPORARY SIGNIFICANCE OF CONCLUSIONS**

The four passages that connect animals with the Sabbath in the Pentateuch can elucidate several points about domestic animal care in ancient Israel (and perhaps imply responsibilities for modern humans regarding animal rest and care). First of all, throughout the exposition of the Sabbath commandment and the sabbatical year in the law codes, domestic animals are almost always included. Although not mentioned in every passage regarding the Sabbath, the clearest commands involve animals in Sabbath rest.

Second, this involvement does not just entail cessation of labor on the Sabbath, although the law codes do speak elsewhere of care for animals’ needs, easing their burdens, freedom to eat while working, etc. Exodus 23:10–12 emphasizes repose, rejuvenation, and possibly even mental/emotional tranquility for animals (beyond simply rest from physical labor on the Sabbath) by the use of the same verb (ἐστάλασσε) that was applied to God’s rest in Exodus 20, as well as the purpose clause of Sabbath observance that specifically refers to animals before servants and strangers. These hints of the high priority of animal life in the Bible also command a caring responsibility from humans.
towards animals (perhaps even towards their very inward beings [Prov 12:10]), and certainly imply humane treatment on every day of the week.\footnote{64}

Third, although animals may not observe the Sabbath in the way that humans do, and are not equal to humans in the sacredness of their lives (Gen 9:5–6; Lev 24:21), in many other ways animals have the same rights and privileges as humanity. Specifically, this similarity is shown in the application of the sabbatical year (connected to the blessing of the Sabbath) to the wild animals as well as domestic creatures (and even the land itself!). Perhaps the reason wild animals are not included in the Sabbath commandments is that they already have the privilege of rest on the Sabbath as they do not work for humans. As mentioned above, domestic animals are most likely to be taken for granted and worked round the clock, so that humans can rest on the Sabbath. Thus, care for those who are often oppressed and heavy-laden extends to the animal kingdom as well as human servants and slaves.

In conclusion, concern for animals is a clearly identifiable theme in Pentateuchal law, and in the divinely ordered “creation-inclusive theology,”\footnote{65} humans must insure that even those animals that are crucial for humanity’s survival will be able to rest and be

\footnote{65} Jay B. McDaniel (“A God Who Loves Animals and a Church That Does the Same,” in \textit{Good News for Animals? Christian Approaches to Animal Well-Being} [ed. Charles Pinches and Jay B. McDaniel; Ecology and Justice Series; Maryknoll, N.Y.: Orbis, 1993], 77) urges that we must care about each individual animal with eyes just as much as the rainforests.
refreshed on the Sabbath.66 Along these lines, humanity cannot thus dismiss care for animals on biblical grounds by reasoning that the earth will eventually burn anyway. Other living creatures are co-inhabitants of the world, and as they also depend heavily on its ecosystems for survival, the Bible holds humankind responsible for the preservation of the earth and the care of all living creatures.

Although much further investigation needs to be done in this area, a few questions came to the forefront during this study. How do the Sabbath commandments relate to non-working domestic animals? Were wild animals simply the beneficiaries of the rest for the land in Leviticus 25, and if so, does the land take priority over the creatures? In addition, how should rest for the land be understood in the light of the connection between God’s rest and animal rest? As domestic animals are often associated and connected with human servants, in what ways are animals actually considered part of the household in the Bible? Does this association with humanity make them responsible for keeping the Sabbath on some level?
